

Abstract of Presentation

Note: This paper should be typed in “Times New Roman” of 12pt.

Presentation Title(Should be no more than 20 words):

Establishment and Activities of
Thailand- Japan Research Collaboration Center on Emerging and Re-emerging
Infections(RCC-ERI)

Abstract (Should be no more than 150 words):

RCC-ERI is established by the collaboration of Dept. of Med. Sciences, Thailand and Res. Inst. Microb. Dis., Osaka Univ, Japan supported by both Thai and Japanese government organizations started from 2005 as a 5-year-project.

The roles of this center are to study the basic research to the applicable ones on infectious diseases, to nurture young scientists in this field and to publicize the knowledge to prevent infectious diseases.

The framework and the implementation of RCC-ERI activities shall be discussed in annual Steering Committee and monthly Working Group Meetings, respectively. The approved research projects at present are 17 titles in the fields of Bacteriology, Virology, Epidemiology and Bioinformatics.

We have 19 members including 2 administration officers and 2 volunteers, all are living in Thailand and are multi-national; one Chinese, one Sri Lankan, 9 Thai and 8 Japanese.
