

Original Papers

- [23] “Ultra-narrow-band thermal exciton radiation in intrinsic one-dimensional semiconductors”
Taishi Nishihara, Akira Takakura, Yuhei Miyauchi, and Kenichiro Itami
Nature Communications, **2018**, 9, 3144.
- [22] “Synthesis and size-dependent properties of [12], [16], and [24]carbon nanobelts”
Guillaume Povie, Yasutomo Segawa, Taishi Nishihara, Yuhei Miyauchi, and Kenichiro Itami
Journal of the American Chemical Society, **2018**, 140, 10054–10059.
- [21] “A water-soluble warped nanographene: synthesis and applications for photo-induced cell death”
Hsing-An Lin, Yoshikatsu Sato, Yasutomo Segawa, Taishi Nishihara, Nagisa Sugimoto,
Lawrence T. Scott, Tetsuya Higashiyama, and Kenichiro Itami
Angewandte Chemie International Edition, **2018**, 57, 2874–2878.
- [20] “Unidirectional molecular assembly alignment on graphene enabled by nanomechanical symmetry breaking”
Liu Hong†, Taishi Nishihara†, Yuh Hijikata, Yuhei Miyauchi, and Kenichiro Itami
Scientific Reports, **2018**, 8, 2333 (†: Equal contribution).
- [19] “Electro-activated conductivity and white light emission of a hydrocarbon nanoring-iodine assembly”
Noriaki Ozaki, Hirotohi Sakamoto, Taishi Nishihara, Toshihiko Fujimori, Yuh Hijikata, Ryuto Kimura, Stephan Irle, and Kenichiro Itami
Angewandte Chemie International Edition, **2017**, 56, 11196–11202.
- [18] “Synthesis of a carbon nanobelts”
Guillaume Povie, Yasutomo Segawa, Taishi Nishihara, Yuhei Miyauchi, and Kenichiro Itami
Science **2017**, 356, 172–175.
- [17] “Photophysics of trions in single-walled carbon nanotubes: a short review”
Taishi Nishihara, Makoto Okano, Yasuhiro Yamada, and Yoshihiko Kanemitsu
ECS Journal of Solid State Science and Technology, **2017**, 6, M3062–M3064.
- [16] “Key structural elements of unsymmetrical cyanine dyes for highly sensitive fluorescence turn-on DNA probe”

Kakishi Uno, Taeko Sasaki, Nagisa Sugimoto, Hideto Ito, **Taishi Nishihara**, Shinya Hagihara, Tetsuya Higashiyama, Narie Sasaki, Yoshikatsu Sato, and Kenichiro Itami
An Asian Journal, **2017**, 12, 233–238.

[15]“Construction of covalent organic nanotubes by light-induced cross-linking of diacetylene-based helical polymers”

Kaho Maeda, Liu Hong, **Taishi Nishihara**, Yusuke Nakanishi, Yuhei Miyauchi, Ryo Kitaura, Naoki Ousaka, Eiji Yashima, Hideto Ito, and Kenichiro Itami
Journal of the American Chemical Society, **2016**, 138, 11001–11008.

[14]“Dynamics of the lowest-energy excitons in single-walled carbon nanotubes under resonant and nonresonant optical excitation”

Taishi Nishihara, Yasuhiro Yamada, Makoto Okano, and Yoshihiko Kanemitsu
The Journal of Physical Chemistry C, **2015**, 119, 28654–28659.

[13]“Fast dissociation and reduced Auger recombination of multiple excitons in closely packed PbS nanocrystal thin films”

Taishi Nishihara, Hirokazu Tahara, Makoto Okano, Masashi Ono, and Yoshihiko Kanemitsu
The Journal of Physical Chemistry Letters, **2015**, 6, 1327–1332.

[12]“Cycloparaphenylene-based ionic donor–acceptor supramolecule: Isolation and characterization of $\text{Li}^+@C_{60}C[10]CPP$ ”

Hiroshi Ueno, **Taishi Nishihara**, Yasutomo Segawa, and Kenichiro Itami
Angewandte Chemie International Edition, **2015**, 54, 3707–3711.

[11]“Impact of surface ligands on photocurrent enhancement due to multiple exciton generation in close-packed nanocrystal thin films”

Masashi Ono, **Taishi Nishihara**, Toshiyuki Ihara, Makoto Kikuchi, Atsushi Tanaka, Masayuki Suzuki, and Yoshihiko Kanemitsu
Chemical Science, **2014**, 5, 2696–2701.

[10]“Exciton recombination dynamics in nanoring cycloparaphenylenes”

Taishi Nishihara, Yasutomo Segawa, Kenichiro Itami and Yoshihiko Kanemitsu
Chemical Science, **2014**, 5, 2293–2296.

- [9] “Chemical doping-induced changes in optical properties of single-walled carbon nanotubes”
Makoto Okano, **Taishi Nishihara**, Yasuhiro Yamada, and Yoshihiko Kanemitsu
Japanese Journal of Applied Physics, **2014**, 53, 05FD02.
- [8] “Quantized exciton–exciton recombination in undoped and hole-doped single-walled carbon nanotubes”
Taishi Nishihara, Yasuhiro Yamada, Makoto Okano, and Yoshihiko Kanemitsu
Japanese Journal of Applied Physics, **2014**, 53, 02BD10.
- [7] “Dissipative structure in the photo-induced phase under steady light irradiation in the spin crossover complex”
Taishi Nishihara, Azzedine Bousseksou, and Koichiro Tanaka
Optics Express, **2013**, 21, 31179–31188.
- [6] “Trion formation and recombination dynamics in hole-doped single-walled carbon nanotubes”
Taishi Nishihara, Yasuhiro Yamada, Makoto Okano, and Yoshihiko Kanemitsu
Applied Physics Letter, **2013**, 103, 023101.
- [5] “Dynamics of excitons and trions in semiconducting carbon nanotubes”
Makoto Okano, **Taishi Nishihara**, Yasuhiro Yamada, and Yoshihiko Kanemitsu
Proceeding of SPIE, **2013**, 8623, 86231F.
- [4] “Excited states in cycloparaphenylenes: dependence of optical properties on ring length”
Taishi Nishihara, Yasutomo Segawa, Kenichiro Itami, and Yoshihiko Kanemitsu
The Journal of Physical Chemistry Letters, **2012**, 3, 3125–3128.
- [3] “Dynamics of exciton-hole recombination in hole-doped single-walled carbon nanotubes”
Taishi Nishihara, Yasuhiro Yamada, and Yoshihiko Kanemitsu
Physical Review B, **2012**, 86, 075449.
- [2] “The light-induced spin transition of tetranuclear spin crossover complex
[Fe₄(CN)₄(bpy)₄(tpa)₂](PF₆)₄”
Taishi Nishihara, Masayuki Nihei, Hiroki Oshio, and Koichiro Tanaka
Journal of Physics: Conference Series, **2009**, 148, 012033.

[1] "Nanoparticles of iron (II) spin-crossover"

Thibaut Forestier, Stephane Mornet, Nathalie Daro, **Taishi Nishihara**, Shin-ichiro Mouri, Koichiro Tanaka, Olivier Fouche, Eric Ferysz, and Jean-Francois Letard
Chemical Communications, **2008**, 36, 4327–4329.
