

## Research Interests

### PARTICIPANTS' AREAS OF RESEARCH AND TECHNICAL WORK

*	Committee Member
**	Speaker

*Atsushi Hotta, Keio University*

Our group will take both experimental and theoretical approaches to link the physical properties of novel soft materials with their underlying chemical structures (ranging from atomic-, through nano-, to micron-scales) as well as their industrial applications (e.g. nanomaterials, biomaterials, eco-friendly materials). Our major research targets will be polymers, and the keywords for our research project will be "multilayered structures" and "self assembly."
