

Research Interests

PARTICIPANTS' AREAS OF RESEARCH AND TECHNICAL WORK

*	Committee Member
**	Speaker

Junichi Fujino

His fields of research include environmental modeling analysis, especially on energy-economy system modeling and bioenergy study. He is involved in the development of the Asia-Pacific Integrated Model (AIM) to estimate climate change impact and to assess policy options for stabilizing global climate. He is currently fully engaging on “Japan Low-Carbon Society Scenario Project” to envision 70% CO₂ emissions reductions by 2050.
