

総括

フォーラムの全体を通じて、各国の政策や最新の研究成果について積極的に情報共有が行われ、フォーラムに参加した政策立案者や研究者間での緊密なネットワーク構築に成功した。また、建設的な議論の結果、「低炭素社会」、「気候変動」、「水管理」分野における研究課題や方向性が示された。このように、日中韓グリーンテクノロジーフォーラムは、今後の研究交流及び共同研究に向けて所期の目的を上回る大きな成果をあげることができた。

Summary

Throughout the forum, the information on the policies of three countries and the knowledge on the latest outcome of researches were positively shared among the participants of the forum, with the result that close networks among policy makers and scientists were successfully established. Moreover, important research themes or direction in the fields of “Low Carbon Society”, “Climate Change” and “Water Management” were shown as a result of constructive discussion. In conclusion, the results of the forum were so fruitful that we could expect future research exchange and international joint research would be promoted.
