*Ichiroh Kanaya, Osaka University*

Ichiroh Kanaya, Ph.D. is a computer scientist who has deep interests in form of "flavor" of aesthetic surfaces, Hyper-Real designing tools based on mixture of physical and digital materials, and design of "future furniture." He has also achieved the world-first complete 3-D digital modeling of Pyramids in Egypt as a member of the joint digital-heritage experts group directed by Dr. Zahi Hawass, an Egyptian archaeologist. He is working with Prof. Kazuo Kawasaki, Ph.D., who is a world-class product designer, in his design field.
