International Forum Intelligence Augmentation and Amplification plus Society 2024

Tuesday 16 January from 9.30 am to 3.30 pm

**IEA de Paris, 17 quai d'Anjou, 75004 Paris | In English**

Mandatory registration: https://forms.gle/AzEVMMviH1XTtbxg7

This event provides a forum for innovative dialogue to explore novel research issues for a future symbiotic society with Artificial Intelligence. The intensive dialogue is planned between junior and senior researchers in the field of social sciences and humanity (SSH) and of computer/engineering sciences (CS/ES), revolving around artificial intelligence, with researchers from Japan and France. Participants will have the opportunity to present the current state of their research in the following panels:

1) Working in a Cyber-Physical AI world: which interactions between human beings and machines?

2) AI ethics: how to envisage fair and explicable uses of AI? The impact of generative AI on child development and the transformation of educational models

3) The Influence of AI and information technologies on human communication, consensus building, and issue of fake news.

With two guest speakers:

Daniel ANDLER   **Olivier ALEXANDRE**

AI's proper place   *What is Tech? A meta-industry*
