

Date Prepared: May 7, 2010

Curriculum Vitae

Personal Information

Name: (First, Last) Yutaka Orihara

Home Address and Telephone: Harayama 2-3-7-601, Inzai, Chiba 270-1341,
Japan
+81-(0)476-47-2902

Office Address and Telephone: Experiment Station for Medicinal Plant Studies,
Graduate School of Pharmaceutical Sciences,
The University of Tokyo,
Hongo-7-3-1, Bunkyo-ku, Tokyo 113-0033,
Japan,
+81-(0)3-5841-4758

FAX: +81-(0)3-5841-4758 (office)

E-mail: oriharay@mol.f.u-tokyo.ac.jp

Date and Place of Birth: April 19, 1954. Tochigi, Japan

Citizenship/Permanent Resident: Japan

Education

Date/Degree/Major/School/City/State:

March 1978/ Bachelor of Pharmaceutical Sciences/ Faculty of
Pharmaceutical Sciences, The University of Tokyo/ Tokyo,
Japan/

March 1980/ Master of Pharmaceutical Sciences/ Graduate School of
Pharmaceutical Sciences, The University of Tokyo/ Tokyo,
Japan/

July 1993/ Doctor of Pharmaceutical Sciences/ Graduate School of
Pharmaceutical Sciences, The University of Tokyo/ Tokyo,
Japan/

Work Experience

Title: Assistant Professor

Dates: April, 1980 - June 1996

Employer's Name, Address:

Laboratory of Pharmacognosy and Phytochemistry,
Faculty of Pharmaceutical Sciences, Kitasato University,
Shirokane 5-9-1, Minato-ku, Tokyo 108-8641, Japan

Title: Associate Professor

Dates: July 1996 - Now

Employer's Name, Address:

Experiment Station for Medicinal Plant Studies,
Graduate School of Pharmaceutical Sciences, The University of Tokyo,
Hongo-7-3-1, Bunkyo-ku, Tokyo 113-0033, Japan,

Research Interests

Production of useful secondary metabolites using plant tissue culture techniques

Biotransformation of exogenous compounds by cultured plant cells

Biosynthesis of secondary metabolites in medicinal plants

Bibliography

K. Shudo, T. Ohta, Y. Orihara, T. Okamoto, M. Nagao, Y. Takahashi and T. Sugimura: Mutagenicities of phenacetin and its metabolites. *Mutation Research*, **58**(2-3), 367-370 (1978).

K. Shudo, Y. Orihara, T. Ohta and T. Okamoto: An unusual nucleophilic attack on a carbonyl oxygen. Reaction of a positively charged oxygen atom. *J. Am. Chem. Soc.*, **103**(4), 943-944 (1981).

T. Furuya, T. Yoshikawa, Y. Orihara and H. Oda: Saponin production in cell suspension cultures of *Panax ginseng*. *Planta medica*, **48**(2), 83-87 (1983).

T. Furuya, T. Yoshikawa, Y. Orihara and H. Oda: Studies on the culture conditions for *Panax ginseng* cells in jar fermentor. *J. Natur. Prod.*, **47**(1), 70-75 (1984).

T. Furuya, Y. Orihara and C. Hayashi: Triterpenoids from *Eucalyptus perriniana* cultured cells. *Phytochemistry*, **26**(3), 715-719 (1987).

T. Furuya, Y. Orihara and H. Miyatake: Biotransformation of (-)-menthol by *Eucalyptus perriniana* cultured cells. *J. Chem. Soc., Perkin Trans. I*, 1711-1719

(1989).

T. Furuya, Y. Orihara and Y. Tsuda: Caffeine and theanine from *Camellia sinensis* cultured cells. *Phytochemistry*, **29**(8), 2539-2543 (1990).

Y. Orihara and T. Furuya: Production of theanine and other γ -glutamyl derivatives by *Camellia sinensis* cultured cells. *Plant Cell Reports*, **9**(2), 65-68 (1990).

T. Furuya, K. Koge and Y. Orihara: Long term culture and caffeine production of immobilized coffee (*Coffea arabica* L.) cells in polyurethane foam. *Plant Cell Reports*, **9**(3), 125-128 (1990).

Y. Orihara and T. Furuya: Biotransformation of 18 β -glycyrrhetic acid by cultured cells of *Eucalyptus perriniana* and *Coffea arabica*. *Phytochemistry*, **29**(10), 3123-3126 (1990).

Y. Orihara, H. Miyatake and T. Furuya: Triglycosylation on the biotransformation of (+)-menthol by cultured cells of *Eucalyptus perriniana*. *Phytochemistry*, **30**(6), 1843-1845 (1991).

T. Furuya, Y. Orihara and K. Koge: Biotransformation of theobromine to caffeine in suspension and polyurethane foam immobilized coffee (*Coffea arabica* L.) cells. *Plant Cell Reports*, **9**(12), 659-662 (1991).

Y. Orihara, K. Saiki and T. Furuya: Biotransformation of steviol by cultured cells of *Coffea arabica* and *Eucalyptus perriniana*. *Phytochemistry*, **30**(12), 3989-3992 (1991).

K. Koge, Y. Orihara and T. Furuya: Effect of pore size and shape on the immobilization of coffee (*Coffea arabica* L.) cells in porous matrices. *Appl. Microbiol. Biotechnol.* **36**(4), 452-455 (1992).

Y. Orihara, T. Furuya, N. Hashimoto, Y. Deguchi, K. Tokoro and T. Kanisawa: Biotransformation of isoeugenol and eugenol by cultured cells of *Eucalyptus perriniana*. *Phytochemistry*, **31**(3), 827-831 (1992).

Y. Orihara and T. Furuya: Effects of bioregulators and administration methods on the biotransformation of monoterpenes by cultured cells of *Eucalyptus perriniana*. In "Biochemical Engineering for 2001, Proceedings of Asia-Pacific Biochemical Engineering Conference 1992", (Ed. by S. Furusaki, I. Endo and R. Matsumoto), pp.277-279, Springer-Verlag, Tokyo.

K. Koge, Y. Orihara and T. Furuya: Caffeine production by polyurethane foam immobilized coffee (*Coffea arabica* L.) cells. In "Biochemical Engineering for 2001, Proceedings of Asia-Pacific Biochemical Engineering Conference 1992", (Ed. by S. Furusaki, I. Endo and R. Matsumoto), pp.299-301, Springer-Verlag, Tokyo.

K. Koge, Y. Orihara and T. Furuya: Immobilization and culture of coffee (*Coffea arabica* L.) cells on novel culture systems using a basket-shaped unit, "EGSTAR". *Biotechnology Techniques*, **6**(4), 313-318 (1992).

Y. Orihara and T. Furuya: Biotransformation of (-)-borneol by cultured cells of *Eucalyptus perriniana*. *Phytochemistry*, **34**(4), 1045-1048 (1993).

Y. Orihara, K. Saiki and T. Furuya: Biotransformation of caryophyllene oxide by cultured cells of *Eucalyptus perriniana*. *Phytochemistry*, **35**(3), 635-639 (1994).

Y. Orihara, T. Noguchi and T. Furuya: Biotransformation of (+)-camphor by cultured cells of *Eucalyptus perriniana*. *Phytochemistry*, **35**(4), 941-945 (1994).

Y. Orihara and T. Furuya: Biotransformation of 1,8-cineole by cultured cells of *Eucalyptus perriniana*. *Phytochemistry*, **35**(3), 641-644 (1994).

Y. Orihara and T. Furuya: Biotransformation of (+)- and (-)-fenchone by cultured

cells of *Eucalyptus perriniana*. *Phytochemistry*, **36**(1), 55-59 (1994).
