The Gender Summit is an international movement to discuss science and gender, started by initiative of the EU Commission, which is the policy implementing body of the European Union. The Gender Summit intends to encourage a higher quality of innovation, in which we consider the difference of gender as an important factor, discuss the better research and development and utilize the discussion outcomes actively and practically for education, human development, basic research and commercialization. In the past Gender Summits, there was broad participation from academia, international organizations such as the UN, national governments and industry, which marked a unique feature of this Summit.

Even without mentioning the Global Gender Gap Index (GGI) published by the World Economic Forum, it is well known that Japan has lagged behind in attaining a Gender Equal Society. Incorporating the dimension of gender into every aspect of education, academic research and innovation is essential. Moreover, prompted by the Female Empowerment Law that came into effect on April 2016, promoting women in all workplaces is required now more than ever.

As such, cooperating with the Science Council of Japan (SCJ), we have decided to organize the Gender Summit 10, the first Gender Summit in Japan. The main theme is “Better Science and Innovation through Gender, Diversity and Inclusive Engagement” . We have six working groups, and already started having active discussions toward the Gender Summit 10. We will discuss mainly top-priority global issues tackled by female researchers, and social responsibilities of science in the Gender Summit 10.

We would like to encourage a broad spectrum of people from academia, the public sectors, industry and the education sectors to participate in the Gender Summit 10, sharing the urgent issues we are facing and discussing the solutions.

We eagerly look forward to your participation.

ジェンダーサミットは、「科学技術」と「ジェンダー（社会的に作り出された男女の差異）」に関する国際会議です。（従来の、男女を社会の対等な構成員とする「男女共同参画社会」構築のための取り組みに限定することなく、）イノベーションの質の向上のために、男女の性差を重要な要因と捉えて研究開発の有るべき姿を議論するという点に特長があります。

イノベーション創出においては、多様な人材が参画し、多様な視点で研究開発を行う環境が重要です。新しい研究開発が求められている現在、ダイバーシティの一要素としてのジェンダーに軸足を置いて、新たな研究開発のあり方を議論する本会議の開催は時宜を得たものと考えております。

本ジェンダーサミットの開催を契機として、これからの時代に求められる新しいジェンダーのあり方を具体化し、さらには誰もが才能を開花し得る社会の実現のための機運の醸成につなげていきます。
