Alternative Energy

Roger Clark is silicon technology manager at BP Solar in Frederick, Maryland. In this position, he leads a team of scientists and technical staff to develop new products, processes, and equipment to reduce the manufactured cost of solar silicon wafers. Previously, he was silicon scientist and senior process engineer at BP Solar, and program manager, manufacturing engineering manager, and process engineer at AstroPower in Newark, Delaware. Mr. Clark has numerous publications and one patent. He received a B.S. in chemistry and an M.B.A. from the University of Delaware.
