

Research Interests

PARTICIPANTS' AREAS OF RESEARCH AND TECHNICAL WORK

*	Committee Member
**	Speaker

*Se-Hee Lee***, University of Colorado, Boulder

My primary research interests have concentrated on nanostructured materials for energy applications. I have been engaged in the research and development of a variety of technical subjects, including solid-state thin-film lithium batteries, nano-composite supercapacitors for energy storage, ion-insertion mechanisms in advanced materials, and fiber-optic hydrogen sensors based on chemochromic actuation.
