PARTICIPANTS' AREAS OF RESEARCH AND TECHNICAL WORK

*	Committee Member
**	Speaker

Sissy Nikolaou, Mueser Rutledge Consulting Engineers

I am a geotechnical earthquake engineer who has worked on projects requiring innovative foundation solutions throughout the United States, Japan, Europe, and Middle East. I have introduced geographic information systems for displaying and analyzing geospatial problems in risk analyses. I have served as a leading member on teams of government agencies that develop seismic design criteria for buildings, infrastructure, and critical facilities.
