

# JST-Stanford Symposium

## Practical Innovations Against COVID-19

### About Symposium

Science and technology are key to overcoming crises. So how are we approaching the unprecedented crisis of COVID-19? Experts from Stanford University, an iconic leader in Silicon Valley's innovation ecosystem, and from the Japan Science and Technology Agency (JST), an influential public research funding agency, will come together to discuss today's cutting-edge COVID-19 research trials and the attempts to implement the results in society. Please join these two organizations on the frontline of the COVID-19 response as they share their experiences, foster mutual understanding, and prepare for the deployment of new science and technology innovations.

This symposium is co-hosted by the Japan Science and Technology Agency and the Stanford School of Medicine.

### Zoom Online Symposium

Simultaneous interpretation available

**EST/PST:** Tuesday, February 16, 2021

**Time:** **EST** 8:00 pm - 10:00 pm

**PST** 5:00 pm - 7:00 pm

**Japan Date:** Wednesday, February 17, 2021

**Time:** **JST** 10:00 am - 12:00 pm

**Website:** <https://www.jst.go.jp/inter/washington/stanford/>

**Contact:** [symposium@washingtoncore.com](mailto:symposium@washingtoncore.com)

### RSVP QR CODE

RSVP URL: <https://form.jst.go.jp/enquetes/jst-stanford-2021-registration01>

Prior to the symposium, the event coordinator will send Zoom access information to the participants individually.

**Free Participation**

### Keynote Speakers

**Hiroshi Amano**  
Professor, Nagoya University,  
2014 Nobel Laureate in  
Physics

**Yasuhiro Tsukamoto**  
President,  
Kyoto Prefectural  
University

**Michael Snyder**  
Professor,  
Stanford University  
School of Medicine

### Hosted by

Japan Science and Technology Agency
