[Agenda]

Opening: 1:00-1:20pm

- Seiichi MATSUO, Chancellor, the Tokai National Higher Education and Research System
- Yasuhiro TSUKAMOTO, President, Kyoto Prefectural University
- Michinari HAMAGUCHI, Counselor to the President, Japan Science and Technology Agency
- Ronald PEARL, Professor and Former Chair of Anesthesia Department, Stanford University School of Medicine

Theme: 1:20-1:40pm

- Hiroshi AMANO, Professor, Nagoya University, 2014 Nobel Laureate in Physics
- Yasuhiro TSUKAMOTO, President, Kyoto Prefectural University

Guest speaker: 1:40-2:00pm

- Koichi FUKUNAGA, Professor, Keio University School of Medicine: “Joint research coronavirus task force and expectations for future developments”

Keynote speech 1: 2:00-2:25pm

- Michael SNYDER, Professor, Stanford University School of Medicine: “Managing health using longitudinal big data studies associating multi-omics and wearable data”

Keynote speech 2: 2:25-2:40pm

- Naozumi HASHIMOTO, Professor, Department of Respiratory Medicine, Fujita Health University: “Feasibility Study of NaSC and the expectation for the personalized Medicare”

Break: 2:40-3:00pm

Pitch talks by young scientists: 3:00-3:55pm

- Presentation of proposals by young researchers for the future society and next-generation personalized medicine, developed through U.S.-Japan collaboration, and specific solutions.

Closing: 3:55-4:00pm

- Toshihiko NISHIMURA, Director, Stanford Laboratory for Drug, Device Development and Regulatory Science (SLDDDRS)
- Hiroshi KIMURA, Dean of School of Medicine and the Graduate School of Medicine

Moderator: Masahisa KATSUNO, Director, Medical and Healthcare Innovation Unit (MIU) / Professor, Graduate School of Medicine, Nagoya University
