

Creation of "humane service" industries

R&D Project Title : Smart Interactive Service with Digital Health Modeling

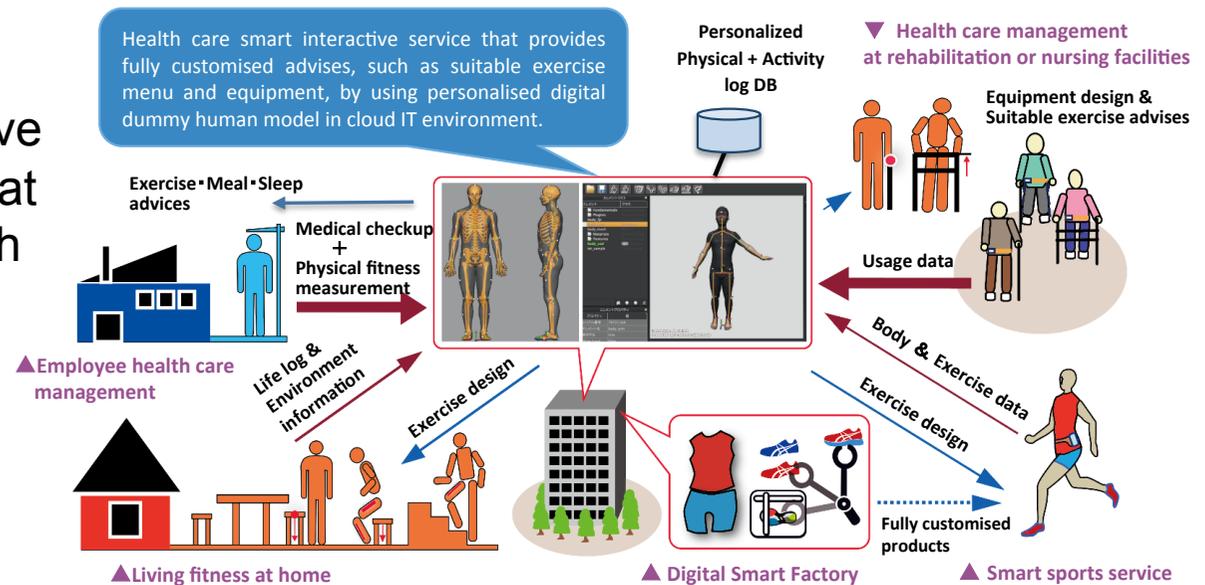

Project Leader : Toshiya Kaihara Kobe University • Professor

R&D Team : Kobe University, National Institute of Advanced Industrial Science and Technology, Hyogo Prefectural Institute of Technology, ASICS Corporation

Summary :

It is crucial to provide personalized health and exercise management services so as to reduce national health care costs in upcoming super-aging society. In this project we create an innovative smart interactive humane service that provides personalized rational health and exercise instruction, which are calculated by daily life movement simulation and data analysis with developing personalized digital human model and life log database.
