

Creation of "humane service" industries

Development of SHARE DINING using information technology

Project Leader : Nahoko KUSAKA Professor, Department of Contemporary Studies,
Doshisha Women's College of Liberal Arts

R&D Team : Kyoto Prefectural University of Medicine
Senior research scientist, Benesse Institute for Research on KAIGO

Summary :

The aim of this research is to build a new community of eating experiences named SHARE DINING using psychological techniques. Senior citizens and other adults with dementia can cook, eat and connect with each other and improve their quality of life using ICT.

Outline of the Project:

To solve the problem of isolation in older people, this project will be conducted using the following criteria:

1. Developing the place and ICT system
2. Exploring the component technology which makes older people's motivation to food and communication improve.
3. Developing a sharing system to provide information for older people with low ICT literacy.
4. SHARE DINING functions as a living lab for eating design where various people and specialists can bring their ideas and explore them.
