

David Wettergreen

Associate Director for Education and Director of the Ph.D. Program, Carnegie Mellon University

Prof. David Wettergreen, The Robotics Institute Carnegie Mellon University. His research focuses on robotic exploration: underwater, on the surface, and in air and space, and the necessary ingredients of perception, planning, learning, and control for robot autonomy. His current project is MoonRanger to search for Water at the South Pole of the Moon by landing in 2022.
