

Outline of the program on open innovation platform for industry-academia co-creation

Objective

Reflecting upon the effects of the Covid-19 pandemic, this program puts forward the vision of a future society based on the SDGs and realizes it through collaboration from industry, academia and the government, with universities being the main driving force. This program will help form centers of excellence that promote backcasting R&D which creates new economic and social values as well as generation and sustainable management of industry-academia co-creation system which supports such backcasting R&D.

(Three pillars)

“People will change.”

Sharing the vision of the society with/after Covid-19 × SDGs

“Universities will change.”

Generating and sustainably managing the system of industry-academia co-creation

“Our society will change.”

Transforming the economic and social system by STI
