RISTEX "Redesigning Communities for Aged Society" **Research and Development Focus Area**

Goals: Creating a variety of Science & Technology for "Aged Society"

A. To develop innovative community-based research programs seeking solutions to critical problems arising in the aged society, which involve relevant multi-stakeholders such as scientific disciplines, government agencies, industries and citizens. B. To introduce methodological innovations in research solving problems of the aged society. C. To create a network of R&D centers which will serve as the resource center for redesigning communities for the aged society

Shape of an aged society gradually unveiling through R&D activities

In various regions and fields, interdisciplinary and interoccupational social technologies have been created and vivid participations in societies by the aged people have

Action research ir

been realized.

collaboration among industry, government, academia and private sector

> Main players in health promotion

Society providing people with

Main players in community support

Shape of an aged society that is vigorous and attractive

Society where people can stay healthy for longer period

Society where people can reliably live as before even after getting weak

Software (systems and services)

Community where people are smiling and fine

Collaboration among industry, government, academia and private sector to realize three shapes of an aged society by utilizing a variety of Science & Technology for Society

Future prospect

As a base used to realize shapes of aged societies that are vigorous and attractive in various regions, we are aiming to realize the "Initiative of Community Aging Problem Solving Center (Network Base) that will link people and organization making efforts to solve the problems of the aged society (industry, government, academia and private sector).

V. Living lab for collaboration among industry, government, academia and private sector, etc.

<Intellectual properties package (example)>

Employment and social contributions of aged people

Measures to promote participation in societies by aged people

Measures for healthy and long lives and for weakening prevention

Measures for promotion of comprehensive community care

Dementia care and preventive measures

Measures to support living of aged people

.....

Concentrating information and intellectual properties that help solve problems of aging, proposing optimum problemsolving measures that respond to social needs, and the like

Aging in place / Aged Friendly Society

Social

innovation
